**DATOS TÉCNICOS**

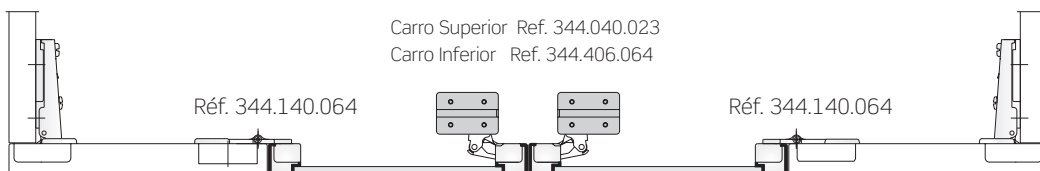

Combinaciones de puertas:  
 Posibles combinaciones de puertas en aluminio y madera.  
 Nos servirá para ver la elección de la bisagra intermedia.

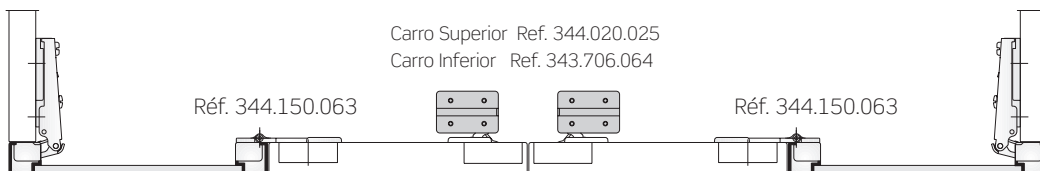

*Aluminio - aluminio*

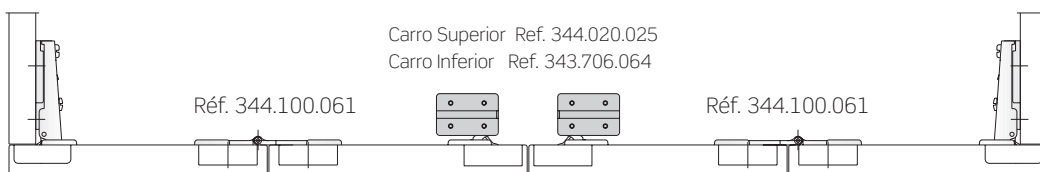

*Madera - aluminio*

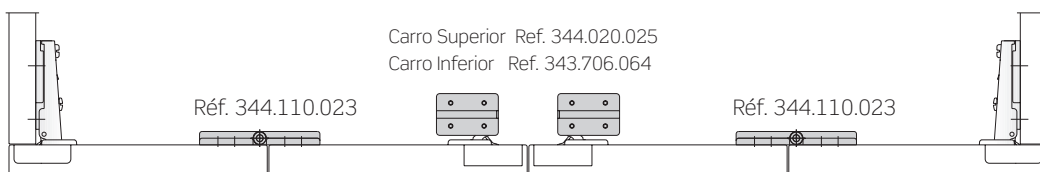

*Aluminio - madera*

*Madera - madera (bisagra de ZAMAK)*

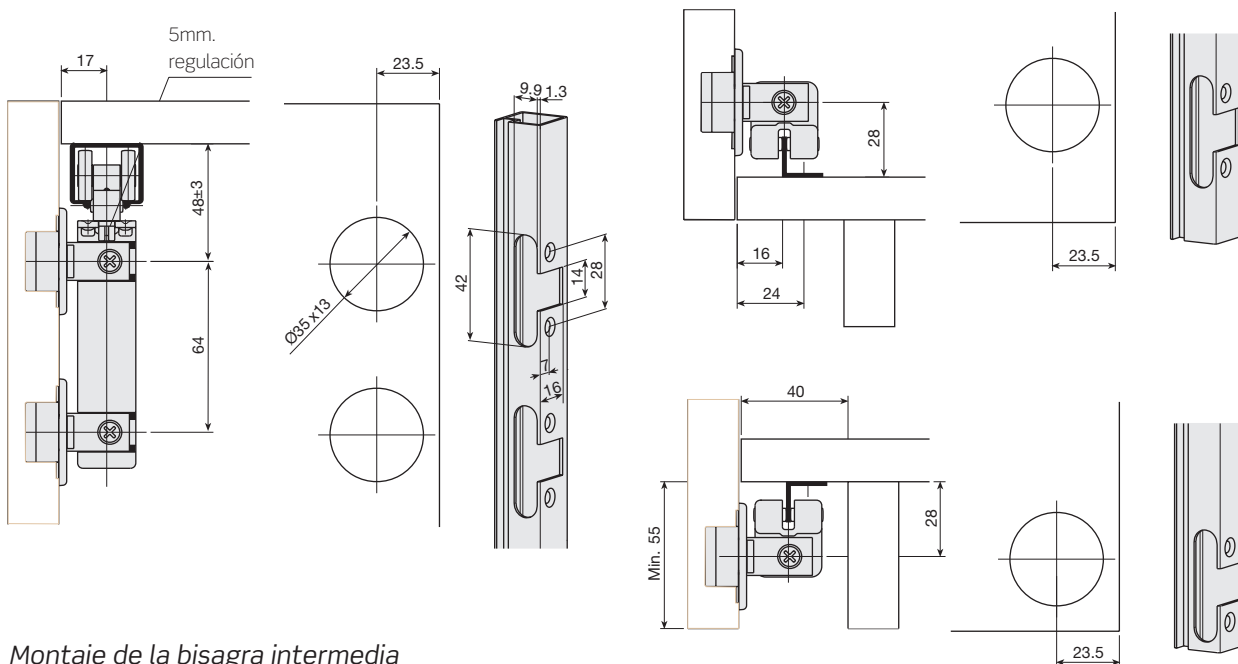

*Madera - madera (bisagra de NYLON)*

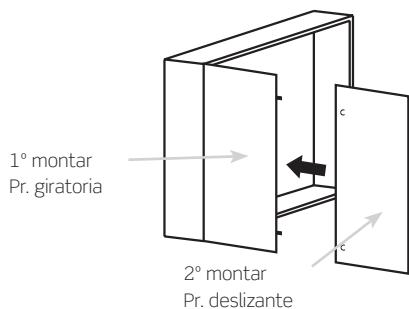

**DATOS TÉCNICOS**

*Alojamiento de los herrajes*

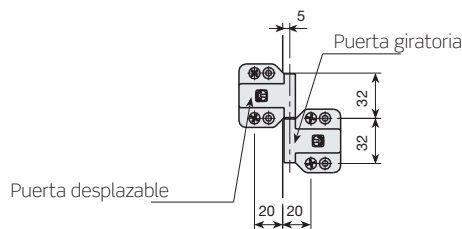

*Montaje de la bisagra intermedia*

Bisagras de ZAMAK

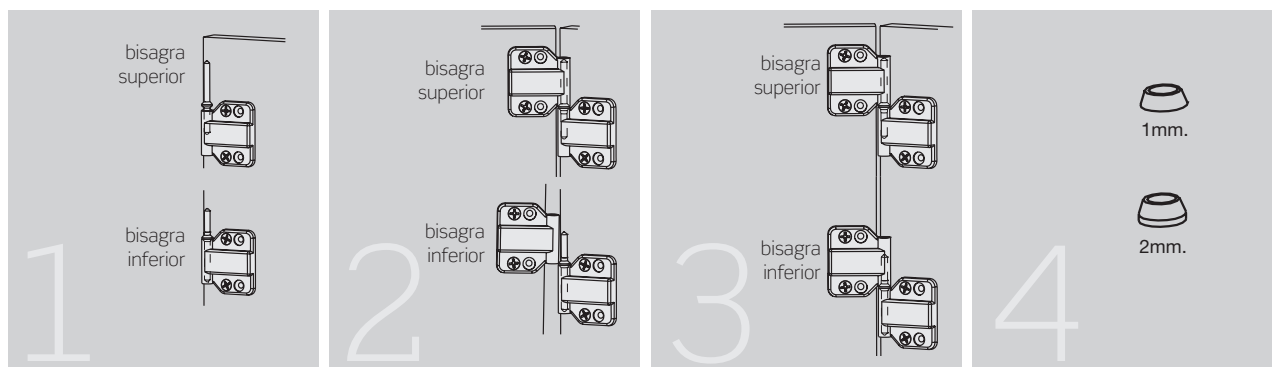

Bisagra en NYLON

Las bisagras de la puerta deslizable se colocan por encima de las de la puerta giratoria.

Vista desde el interior del armario

**Colocar los ejes:**  
 Introducir la parte más corta del eje en la bisagra superior.  
 Introducir la parte más larga del eje en la bisagra inferior.

**Colocar la puerta deslizable:**  
 Introducir únicamente la bisagra superior.

**Alinear ambas puertas:** Guiando en el eje de la bisagra superior, levantar la puerta hasta alinear las bisagras inferiores con sus ejes. Al descender la puerta se encajará automáticamente.

**Para posibles regulaciones:**  
 Utilizar las arandelas incluidas con las bisagras.
